

FES invites you to an

online community research workshop

VOICES OF COAL-AFFECTED COMMUNITIES UNDER LOCKDOWN

Wednesday 14 October 2020 from 11:00 to 12:30

This workshop brings on line the voices of activist researchers from 10 coal affected communities from around South Africa. We will focus on the experiences of coal-affected communities under lockdown, and explore what these may mean for dealing with climate change and a just transition from coal.

The workshop concludes a period of action research in 2020 and aims to provide a congenial, comradely environment for community researchers to share insights from the research, and discuss these with an invited audience.

The organisations participating in the research are: Vaal Environmental Justice Alliance, Vukani Environmental Movement, Khutala Environmental Care Group, Highveld Environmental Justice Network, Matjoba, Mfolozi Community Environmental Justice Organisation, Greater Phola Ogies Women’s Forum, Guide the People, Mabola Alternative Committee, Newcastle Environmental Justice Alliance, GroundWork , Earthlife Africa and SWOP.
